ANNUAL REPORT  
OF THE  
COMMITTEE OF VISITORS  
OF THE  
COUNTY LUNATIC ASYLUMS  
*FOR THE YEAR 1873.*

---

The decrease in the number of Pauper Patients from the County, to which attention was drawn in the last Annual Report of the Visitors, has continued during the past year.

The number has now fallen from 325 on the 1st January, 1873, to 319 at the close of the year, showing a reduction of 6 as against 5 in the year preceding. The number of Out-County Pauper Patients in the two Asylums is 135; on the 1st January, 1873, there were 140: of Non-Pauper Patients 27, last year 24. The Gross total in the two Asylums being now 481; at the beginning of last year 489. The number of Admissions in the past year has been 89—63 from the County, 11 Out-County, and 15 Non-Pauper Patients. The Discharges 51—of whom 39 had recovered and 12 were relieved; the Deaths were 45. Omitting the Non-Pauper Patients from the calculation the recoveries were 37, exactly one half of the Admissions in the Pauper classes—a larger and satisfactory proportion. The number of Deaths is greater than usual, accounted for in a great measure by the debilitated state in which many are sent to the Asylum—one Patient admitted in that state having died the day after her admission.

The general health of the Inmates throughout the year has been good.

The Visitors have again to report their entire satisfaction with the state and condition of the two Establishments at Charminster and Forston under the able management of the Medical Superintendent. He has been efficiently assisted in the discharge of his duties by the two subordinate Medical Officers, one of whom, Mr. Bland, having the more immediate care of Forston Asylum, was appointed permanently in January last after having been in temporary charge.

The Chaplain continues with much zeal and earnestness to labour for the good of those committed to his care. Early in the summer a very serious loss was experienced by the death of a valued and most faithful servant, Samuel Guppy. He had been in the service of the County for nearly 27 years and during the last 18 had acted as Head Attendant in the Wards on the Male side, beside superintending the Farm and Out-door work and the Meat supply for the two Establishments. The Visitors have caused a Tombstone, with a suitable inscription, to be placed in memory of so truly good a man in the Churchyard of Buckland Newton, where he was buried.

Their other old and faithful servant on the female side, Prudence Dewey, though in somewhat failing bodily health continues in the discharge of her services ; the Visitors have given her the assistance of one of the Female Attendants at a small increase of salary.

The Visitors are very sorry to report that they have been obliged to discharge two Attendants in the course of the past year for very gross misconduct. In one case, of grievous assault on a patient, the offender was convicted at Petty Sessions and a penalty of £10 was inflicted on him. In the other case the Visitors punished the delinquent by the forfeiture of the wages then due to him, besides his summary dismissal ; with the exception of these two occurrences the conduct of the Attendants and Servants has been satisfactory.

In consequence of the loss of Samuel Guppy it has been found necessary to divide the duties of Head Male Attendant and Farm Bailiff. Suitable persons have been appointed to these offices, the former at the wages of £45 per annum with house and board, &c., the latter at £52 per annum and house, &c.

The scheme for the formation of a Cemetery, and building a Mortuary Chapel in the Grounds near the Asylum, approved by the Court at the Epiphany Sessions in last year, has not as yet been carried out in its entirety. It appeared to the Visitors that the Mortuary Chapel might possibly be omitted without impropriety, and the Bishop signified his readiness to meet the wishes of the Visitors as to the consecration of the Burial Ground. But on application to the Commissioners in Lunacy objections were raised by them to the proposed omission, and the Visitors are, as yet, uncertain whether those objections can be removed. The enclosing wall is completed and the burial ground is ready except as regards the Mortuary Chapel for consecration.

The want of a suitable place as a Dairy has been long felt, and the engagement of a Farm Bailiff making the provision of a residence for him requisite, the Visitors have, with the approval of the Court given at the last Sessions, contracted with Mr. Gregory for the erection of a Dairy and Bailiff's cottage for the sum of £498 10s. 0d.; this building also is nearly finished.

No application will be made to the County for either of these works as the necessary costs will be provided from the Non-Pauper and Out-County Patients' Surplus Fund.

A Contract has been entered into with the Authorities of the Portsea Union for the reception of their Pauper Lunatics at the rate of 14s. per week, limited by the Commissioners in Lunacy to one year from September last.

The Maintenance rate has stood throughout the year at 1s. 2d. a-day.

The Balance on the credit side in the Non-Pauper and Out-County Patients' Surplus Fund is £1,236 15s. 6d.

The Loan Account stands as follows:—

Amount originally borrowed ... ..	£41,000
Paid from County Rate £13,466	
Ditto from Surplus Fund 4,800	
	<hr/>
	18,266
	<hr/>
Balance due at Michaelmas ... ..	£22,734
	<hr/> <hr/>

JOHN FLOYER,

*Chairman.*

ANNUAL REPORT  
OF THE  
MEDICAL SUPERINTENDENT.

---

*To the Chairman and Visitors of the Dorset County Asylums.*

GENTLEMEN,

At the close of another year it becomes my duty to lay before you a short account of the Asylums and Patients, but as your own Report is so full and comprehensive a very few remarks will, I hope, be deemed sufficient from me.

On the 1st January, 1873, there were in the two Asylums 465 Pauper and Out-County Patients—208 Males and 257 Females; and 23 Non-Pauper or Private—14 Males and 9 Females.

The Admissions during the year from *our own County* have been 32 Males and 31 Females; from Southampton and Plymouth 7 Males and 4 Females (six of whom were chronic incurables): the gross total admitted being 74, namely 39 Males and 35 Females.

It is very painful to be obliged so often to remark on the wretched bodily state in which Patients are admitted—many could not, positively, walk to their wards and, for a considerable time, had to be forcibly fed day and night, simply to ward off immediate death. One of the most persistent cases of refusal of food I ever remember was the case of J. L., a commercial traveller, who was sent here from the Beaminster Union. For upwards of six weeks he had to be fed; this was accomplished with the greatest difficulty as the poor fellow was in such a fearfully shattered condition of bodily health and yet so fixed and persistent were his delusions, and his determination to refuse nourishment so dogged, that it took four and five persons to hold him so that

the proper food may be given without inflicting any injury. His complete recovery, and restoration to his former employment, was the happy result.

Many other cases of almost as severe a nature but much shorter in duration, unhappily too with not so favourable a result, were admitted during the year, tending greatly to increase the labour and anxiety of both Officers and Attendants. In some of these the Mental disease had been long known and recognized, yet no steps were taken to remove such afflicted persons to the Asylum; this is very greatly to be deplored because (and this has been frequently expressed) this delay does, in a very considerable degree, not only add to the trouble, care, and cost, but, what is of infinitely greater importance, lessens the probability of such patients' recovery.

In consequence of the very great and repeated complaints which have been obliged to be made respecting the incorrectness and irregular way in which Orders and Certificates have been made on the admission of Patients, I would desire to call attention thereto.

The 67th Section of the 16th and 17th Vict. c. 97, gives all the regulations &c. necessary to be observed before sending a Patient to the Asylum. One or two things are especially important. The Relieving Officer of the Union is the proper person to act with the Justice of the Peace and not the Overseer, except there is no Relieving Officer. In all cases, too, the Medical Certificate must be *completed* at the time of making the order—if *after* the order, both are invalid, and the Patient must be re-examined. This omission has happened more than once, causing great extra trouble and expense. Another fact must not be overlooked (Sect. 73), that the Medical Certificate must be signed by a Registered Practitioner, who shall have *personally examined* the Patient not more than *seven clear days* previously to his reception into the Asylum. In several cases this year has this important fact been entirely overlooked, and in one case particularly the

medical man had filled up the Certificate and signed it *nearly three weeks before* the Patient was brought here.

The Commissioners in Lunacy invariably return every paper of admission for correction, and this it is which induces me now once more to call attention to the subject. Marginal notes are fully given in each admission paper, showing exactly what ought to be done, and were these notes a little more carefully studied, the Statements and Certificates might be completed without any real trouble, and then the Magistrate signing the necessary order, the whole legal formality is gone through, nothing else remaining but the conveying the Patient to the Asylum. Here I would take the liberty of remarking that in almost all cases some special covered carriage should be got whereby the Patient may be taken from his home in as quiet and private a manner as possible, and this should be done by the Relieving Officer and some other assistant, if necessary, and whenever it is possible to avoid it, Policemen should not be employed, for I know the presence of these officers tend to irritate rather than soothe the mentally disturbed Patient.

The Discharges were 22 Males and 21 Females, of whom 18 Males and 19 Females were recovered, and 3 Males and 2 Females relieved, and 1 Male not improved.

The Deaths were 42—22 Males and 20 Females—rather above our usual average but very easily accounted for, considering the almost hopeless state in which many were received here. The general health and condition of the Inmates during the year has been satisfactory, and no Epidemic disease has appeared.

The Deaths were all from ordinary causes. In one case an Inquest was held, where a Female Patient only lived about 40 hours after admission; no blame was legally attributable to those who brought her, but there certainly seemed to have been a want of judgment in bringing a Patient so far (nearly 30 miles) in so weak and exhausted a condition. Several of our older Patients

have passed away during the year; one, S. H., had lived here ever since 1846; M. A. F. since 1856; C. G. 1850; J. B. 1851; M. H. 1840; A. J. 1844; G. C. 1847; M. P. 1857; and others ten or twelve years—many of course were resident less time. Nine of those who died averaged 54 years of age, ten 64 years, four 75 years, and three 84 years.

The Recreations and Amusements continue as of old. The regular and constant supply of Papers, Periodicals, and Books are a fund of amusement and instruction, and my best thanks are again offered to all those Proprietors who kindly forward their Papers *gratuitously* as in years past.

With the exception of the cases mentioned in your own Report I have much pleasure in stating that the Attendants and Servants have given me very little cause of complaint. The year has passed away happily and comfortably, and with much heartfelt pleasure I especially acknowledge the great and cheerful help ever afforded me by both my Assistant Medical Officers, Mr. Gillespie and Mr. Bland, and every other Officer and Servant I also thank for all they have done to benefit the Asylum and Patients.

In conclusion allow me again to tender you my deep gratitude for all your great and unvarying kindness and consideration; that I may remain worthy of the same for the future shall be my constant aim and endeavour.

With sincere respect,

I am,

Your faithful and obliged Servant,

J. GUSTAVUS SYMES,

*Medical Superintendent.*

NOTE.—Since the commencement of the year another old and good Servant of the County has died. At the close of 1873 it became evident that Mrs. Besant, who has filled the office of Matron at the old Asylum for the past seven years, was failing in health. She was allowed leave of absence, and went to Portland with her daughter, where she had every comfort and attention. Paralysis rapidly came on and she lived but a few weeks.

She was deservedly respected by the Committee of Visitors, the Medical Superintendent, and all other Officers and Servants, with whom she was in daily correspondence.

J. G. S.

# CHAPLAIN'S REPORT.

---

*To the Committee of Visitors of the Dorset County Asylums.*

MY LORDS AND GENTLEMEN,

In presenting my Annual Report I beg to inform you that my duties as Chaplain have been regularly performed during the past year.

Divine Service has been held as usual four times in each week at Charminster and Forston Asylums besides the daily Morning Prayer at Forston. The number of Patients present at the Services at Charminster Chapel has varied but little from that of last year ; at Forston the attendance has not been quite so good *of late*. The average number on Sundays at both Chapels has been as follows :—

Males 87 ; Females 70 : Total 157.

The conduct of the congregation generally has been very good, and the interest they have taken and the attention paid has been encouraging.

The Holy Sacrament has been administered on the first Sunday in each month ; the number of Communicants at the two Asylums at the present time being 30. The Offertory (£3 10s. 5d.) has been handed over to the Charity Fund.

The Patients have been visited by me in their respective wards as regularly as possible (the fixed days for such visiting being Tuesdays, Thursdays, and Fridays), Reading Classes have been held, when convenient on those occasions, which have been much appreciated.

Early in October last I commenced night classes for the benefit of the male and female attendants; these classes have been held three times a-week from 7-30 to 9 p.m.; the number attending has been 24; others have promised to join at our next meeting.

The Sacred Singing Classes on Wednesday and Thursday evenings have been carried on as usual, and I have great pleasure in stating that the musical portion of the Patients and Attendants have taken great pains to render their part in our services with much credit to themselves.

The Wards have been well supplied with London and local papers and books which are a considerable source of amusement and instruction to the Patients.

I have again most respectfully to tender you my best thanks for the encouragement you have given me in my sphere of labour and beg to say that it is my chief anxiety to discharge my duties in a faithful and earnest manner.

I have the honor to remain,

MY LORDS AND GENTLEMEN,

Yours very faithfully,

WILLIAM EVANS,

*Chaplain.*

Forston, Dec. 30th, 1873.

---

REPORT  
OF THE  
COMMISSIONERS IN LUNACY,  
14TH OCTOBER, 1873.

---

We have to-day inspected this Asylum for the County of Dorset and its branch Establishment at Forston. The latter has now the services of a Medical Assistant (Mr. Bland), who was appointed in the latter part of the year 1872, and by whom the Case Books there have been well kept.

The Pauper Patients at Charminster are 146 men and 173 women; at Forston, 61 males and 83 women; their total number is 463. The Private Patients at the former are 13 men and 11 women, at the latter, 1 man only and 4 women, their total number is 29. Besides the paupers chargeable to the county, there are some chargeable to Poole, Southampton, and Portsmouth; the last mentioned borough pays 14s. weekly for each patient, the other boroughs are charged 12s. 6d.

The Admissions have reached, since the Commissioners last visit, 91, *i. e.*, 39 paupers of each sex, 3 male and 10 female private patients have been received. On the other hand, 19 paupers of each sex and 2 male and 4 private patients have been discharged—together 44, of whom 35 left upon recovery. The causes of death are such as call for no special notice. One inquest was held, the subject died within a few hours of admission from maniacal exhaustion, several attempts at suicide have been frustrated, and a few fractures and scalp wounds have occurred through accident, chiefly from falls.

The number of Patients registered to-day as under medical treatment is 13 on the male and 19 on the female side, taking the returns from both Establishments. None are to-day under restraint, or in seclusion, a very few were in bed, 7 males and 2 females have been secluded for epileptic mania, for periods from 1 to 7 days, and restraint has been resorted to on the female side only, in two cases; in one instance for 18 days for surgical reasons, in the other, the woman's hands were tied for 12 days on account of extreme violence. There is still no ward set apart as an infirmary at Charminster, which must be regarded as a defect.

We saw every patient on the books, except a man who was out for a few hours only, and 1 of the male and 1 of the female sex away on trial. Many spoke to us and we to them, and none complained of the Attendants, who are now 14 males and 12 females at Charminster, 5 men and 6 women at Forston.

The dress of the patients was not quite satisfactory, and more attention should, we think, be given to that of some of the males of the private class. On the whole the patients' demeanour was orderly and quiet during our visit. A few still complain of the gruel given at breakfast, which, as far as we could learn, is not the fare of the poor in this district. It is made with milk, and from 80 to 100 quarts is the proportion of water to 15lbs. of the oatmeal. Still it is not popular, and tea would be a wise substitution, with bread and butter.

We remarked that too many of the patients have apparently contracted the habit of crouching on the floor or lying on benches with aprons over their faces—a sure indication that the attendants are wanting in vigilance for correction of such practices.

Dinner was on the table as we passed through some of the wards at Charminster; the food consisted of boiled beef, rather hard, with potatoes and turnips, but no mustard. The beer served

out is very fair, and the allowance to each appears sufficient. It would be well, however, to have scales in each ward for inquiry into deficiency of weight—of the subject of complaint by any patient. The meat when cooked is weighed in bulk in the kitchen.

Having arrived early in the morning at Forston, we found the wards there in some disorder, from scrubbing and cleaning, but there was nothing to find fault with in the beds and bedding except that mackintoshes are placed between the sheet and blanket instead of below the blanket. We called attention to this matter. There is not sufficient color, and more objects of interest should be introduced into the wards there; but a great improvement has been effected by boarding a few single rooms (since last visit) and substituting for several of the circular windows others of sash construction. The work of abolition of those objectionable windows is now we trust likely to progress, and we hope that the tile flooring will also be gradually taken up everywhere in the wards. Forston Asylum is still lighted by candles naked in sconces, and in case of any outbreak of fire there does not appear to be sufficient provision for the emergency. No fire engine is nearer than at Dorchester, there are no hydrants about the building, neither is there any fire-engine hose on the premises. A watch now visits its wards four times nightly.

At Charminster, the wards, beds, and bedding, were clean, and when we visited them they were in good order, the ventilation was proper, and the bath rooms and water closets are well kept. In the wards referred to at last visit (Nos. 4 & 5) as without a sufficient number of attendants, we found improvement. The patients in No. 4 are 42 with 2 in charge of them, in No. 5 they are 35 with 3 nurses. The means of washing for the females might still be multiplied with advantage, and the attendants should be induced to encourage personal washing as far as possible.

Some low padded bedsteads are contemplated by Mr. Symes

for epileptics, and we saw one of them in course of manufacture in the shops. As we passed through the shops we saw 4 patients there working as tailors, and 8 are employed in the shoe making department. Enquiry into the employment of others informed us that 4 men act under the engineer, 7 work as carpenters, 3 as masons, 24 on the farm, 20 in the wards; of the women, 30 assist in the laundry, 3 in the kitchen, 24 do needlework, and 35 clean and scrub in the rooms on their side.

The attendance of men at Divine Service has fallen below the insufficient number noticed last year—viz., from 72 to 60, and the women have not improved, this is a matter of much regret to us.

We should also like to have reported, but cannot do so, that more patients had been permitted to attend, during the past twelve months, the Associated Entertainments. It is the more necessary that their number should be increased, and that entertainments should be multiplied, since we are informed that there is a difficulty in taking the patients into the neighbouring town and villages on account of objections unreasonably raised by some of the inhabitants. The limited exercising grounds of this asylum are in good order; at Charminster a new croquet lawn has been laid down, which many patients use. At Forston the men's airing court demands better drainage.

The statutory books at Charminster as well as those at Forston are free from arrears and fully entered up; and of the general condition of the Asylums and of their management, we can repeat the favourable report of the Commissioners who visited last year.

CHARLES PALMER PHILLIPS,	} Commissioners
ROBERT NAIRNE,	
	} in Lunacy.

## DIETARY.

BREAKFAST	$\left\{ \begin{array}{l} \text{Males—6ozs. bread, 1 quart gruel.} \\ \text{Females—5ozs. bread, 1}\frac{1}{2}\text{ pint gruel.} \end{array} \right\}$	Daily.
SUPPER . . . .	$\left\{ \begin{array}{l} \text{Males—8ozs. bread, 2ozs. cheese, or }\frac{1}{2}\text{oz. butter;} \\ \text{beer, }\frac{1}{2}\text{ pint; or, 1 pint tea.} \\ \text{Females—6ozs. bread. 2ozs. cheese, or }\frac{1}{2}\text{oz. butter;} \\ \text{1 pint tea or coffee.} \end{array} \right\}$	Daily.
DINNER . . . .	$\left\{ \begin{array}{l} \text{SUNDAY—16 to 18ozs. suet pudding, with treacle sauce,} \\ \text{and the addition of fruit in summer, and dried fruit in} \\ \text{winter—Males and Females.} \\ \text{MONDAY—3ozs. meat, vegetables not less than 1lb.—} \\ \text{Males and Females.} \\ \text{TUESDAY—5ozs. meat, vegetables as on Monday.} \\ \text{WEDNESDAY—2 pints soup. 2ozs. meat, 5ozs. bread—} \\ \text{Males; 1}\frac{1}{2}\text{ pint soup. 4ozs. bread—Females.} \\ \text{THURSDAY—Meat pie, 12ozs.—Males; 10ozs.—Females.} \\ \text{Vegetables as on Monday.} \\ \text{FRIDAY—5ozs. meat, vegetables as on Monday.} \\ \text{SATURDAY—As on Monday.} \end{array} \right\}$	

Half-pint of ale daily for dinner, except on *Wednesday*, both Males and Females.

Women working in laundry have tea and bread and butter twice a day extra on three washing days, and once a day on three ironing days; also bread and cheese and  $\frac{1}{2}$ -pint of ale for lunch.

Women scrubbing in wards have bread and cheese daily for lunch, with  $\frac{1}{2}$ -pint of ale. Men the same.

Men working in the shops or on the farm have  $\frac{1}{2}$ -pint ale extra at eleven and four o'clock.

Sick Diet as considered necessary by the Medical Superintendent.

Tobacco and Snuff distributed as directed.

Attendants and Nurses are all allowed 7lbs. bread,  $\frac{1}{2}$ lb. butter, 2 ozs. tea, and 8ozs. sugar—in addition they dine in the Servants' Hall, without restriction as to quantity of meat, vegetables, &c.; and for supper bread and cheese *ad libitum*. Males—2 pints ale. Females—1 pint daily.

*N.B.—“All meat is weighed after being cooked, and free from bone.”*

The Milk Gruel is made with best oatmeal and milk. Meat Pie contains 3ozs. of meat without bone. Soup is made from liquor of boiled meat, thickened with Pearl Barley, Rice, Pea Meal, to which are added Vegetables, Herbs, &c.

Fish for Dinner once a-fortnight.
